

I stand against the use of Cellular telephones on flights. I urge that the current restrictions remain in place as they are.

I would site several reasons for this position:

- a.) Cellular phone use is an intrusion on personal privacy in such close quarters.
- b.) Passengers using cellular phones may not be able to here important safety intructions from flight attendant staff.
- c.) Cellular phone use will create tension between those passengers making calls and passengers that feel that it is a violation of their peace and quiet.

Thanks for the opportunity.

Carl
